# SpeedDeck

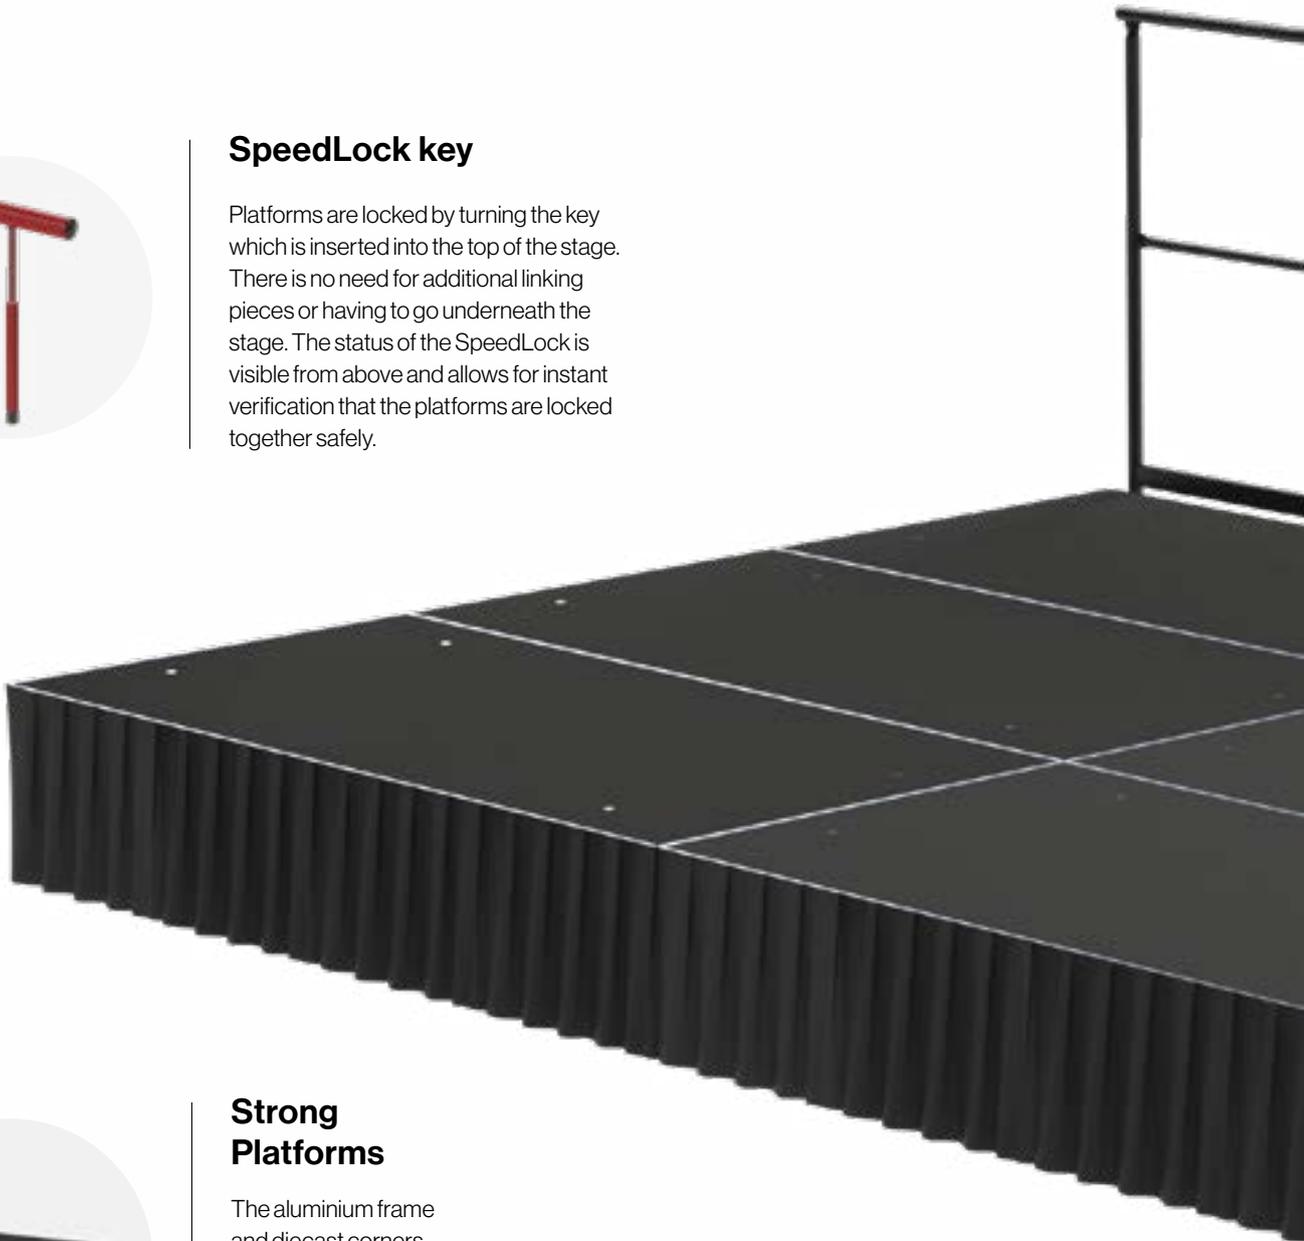

## SpeedLocks

SpeedLocks allow the platforms to be locked together by simply turning the SpeedLock Key. The locks level the platforms and pull them together in one continuous movement, which allows for easy alignment.

## SpeedLock key

Platforms are locked by turning the key which is inserted into the top of the stage. There is no need for additional linking pieces or having to go underneath the stage. The status of the SpeedLock is visible from above and allows for instant verification that the platforms are locked together safely.

## Strong Platforms

The aluminium frame and diecast corners give the platforms incredible strength whilst being light weight and easy to transport.

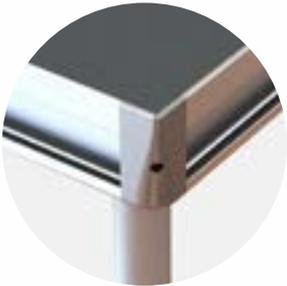

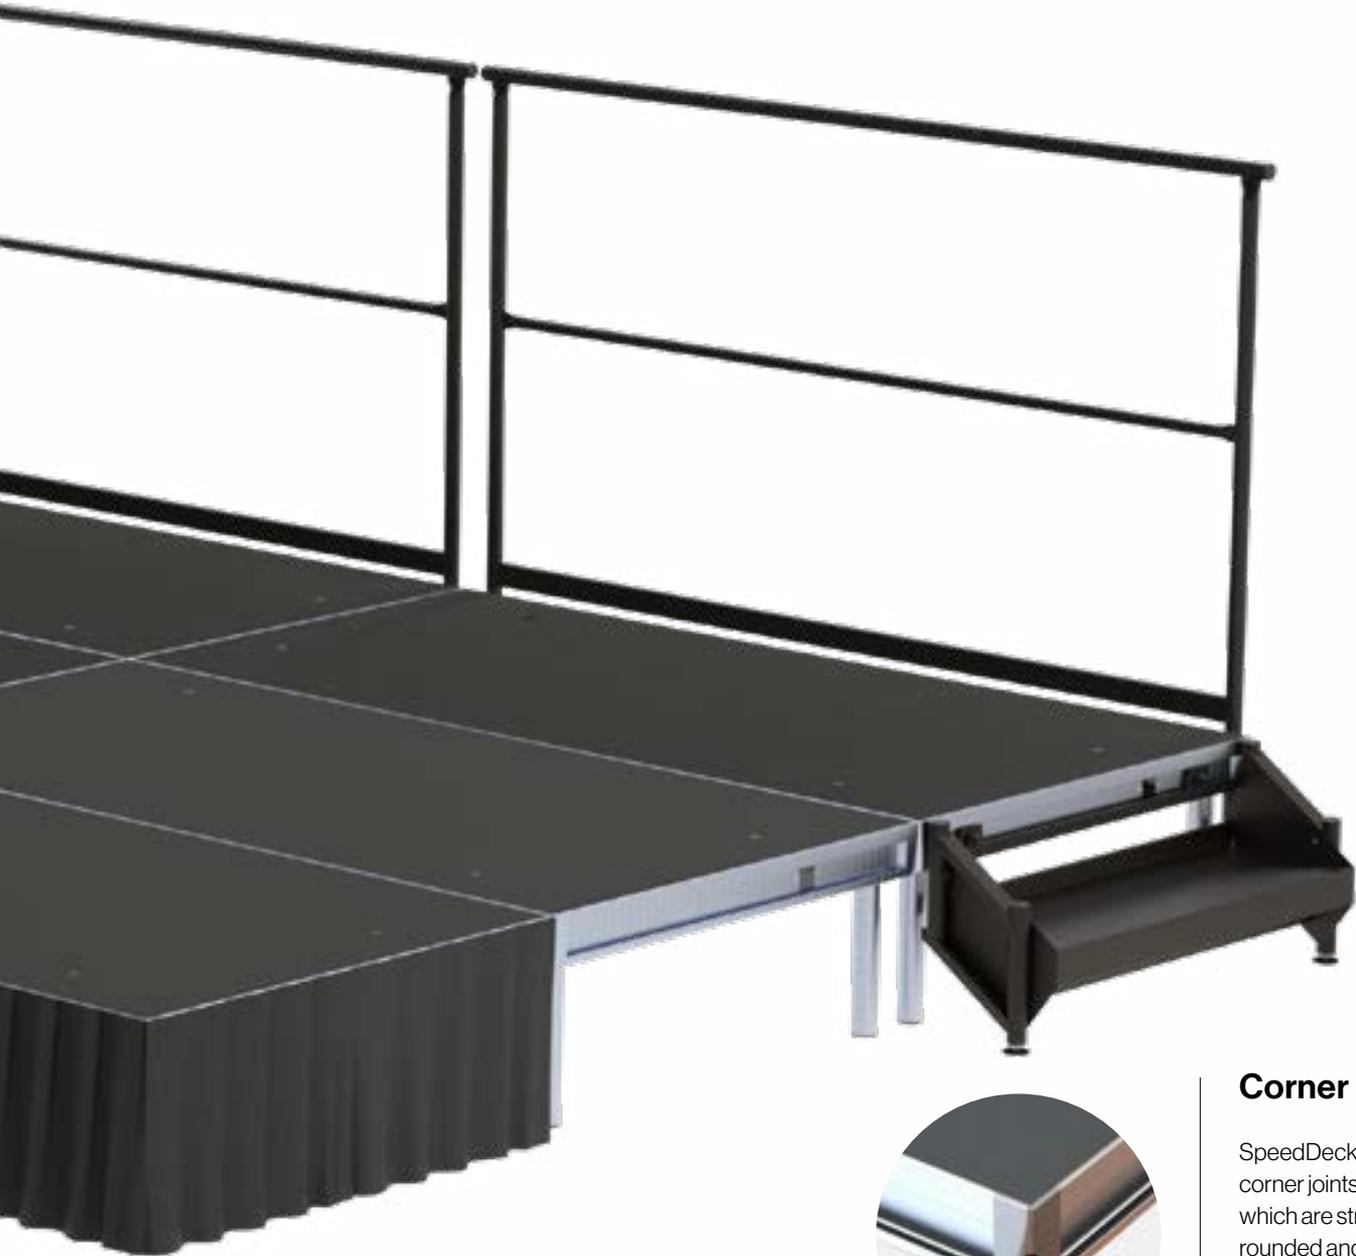

### Handrails & Accessories

Handrail sockets use clamps that are simple, fast, and convenient to install. All SpeedDeck accessories are quick and easy to connect and to remove.

### Leg Sockets

Platform legs are rigidly locked into position by a flick of the integral quick action lever.

### Corner Joints

SpeedDeck has corner joints which are strong, rounded and user friendly which will not damage other things or cause injury to people.

**Our most popular SpeedDeck packages available for fast delivery.**

## 2x3m SpeedDeck

**Includes:**

2x1m SpeedDeck platform with black hexaboard finish x3, platform legs, SpeedLock key, handrails\*, and handrail sockets\*

Stage Height	*With Handrails	Without Handrails

Product code: 112Q21

**Chair Stop 1m**

Product code: 115Q21

**Leg Clamps**

# Tailored design service

If you are looking for a bespoke staging set up, we can tailor a solution for you. We have been trusted in creating staging solutions and user accessibility platforms for events, schools, hotels and houses of worship. Designed and custom built in our UK based factory, from the moment of enquiry to delivery you will be looked after by our experienced in-house team.

## Step 1:

### Understanding your requirements

The first step is to talk to one of our experienced sales team about your staging requirements or send us a technical drawing showing what you need. We will discuss budget, delivery conditions, load and weight requirements alongside other things to consider such as do you require handrails, skirt, stairs or ramps. We will take all of these elements into consideration when creating your custom solution.

### Shapes available

Rectangle

Square

Triangle

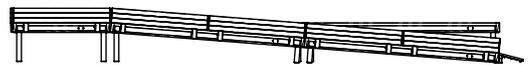

Quad

Custom leg, skirts, stairs and ramps are available in addition to our standard heights

## Step 2:

### Solution Proposal

Based on your requirements, our design team will either create a drawing detailing your solution or using your existing drawing we will confirm the products required. Either option will be presented in a formal quotation for your approval.

## Step 3:

### Final Construction

Once approved, the manufacturing process starts for your custom staging solution and final drawing checks are made before it's custom built in our UK factory. Once built, our production team carry out quality checks and then your finished product is packed and shipped ready for you to use.
