

# Microphone Boom Stand

The Microphone Boom Stands clean and modern design is unlike any other mic stand on the market. The vertical stem has a significant range of height which makes it easy to capture sound from vocals or instruments. The stand can be folded completely flat with ease, and without the requirement of dismantling or adjusting any levers or screws. This mic stand is great for situations where space is limited and is perfect for use in a studio or on stage.

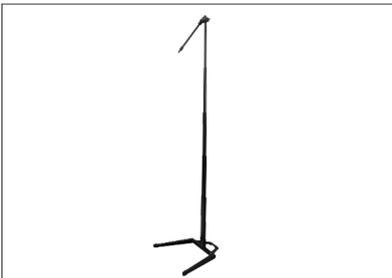

The stand can be folded completely flat which is ideal for transporting and makes it easy to store.

The fully adjustable boom arm allows for the microphone to be easily positioned for a variety of applications. The boom arms length, tilt and swivel can all be adjusted.

The microphone stand can be effective for a wide variety of applications. The vertical stem has a variable height of 513mm - 1849mm. This range of height adjustment allows for the stand to be placed on the ground when there is limited space on a riser. It also allows for the stand to be used in recording booths.

Friction locks will automatically hold the mic at the desired height without the requirement of adjusting any thumb screws or levers. The anodised aluminium stem is very strong and rigid, ensuring that the stand will not sway.

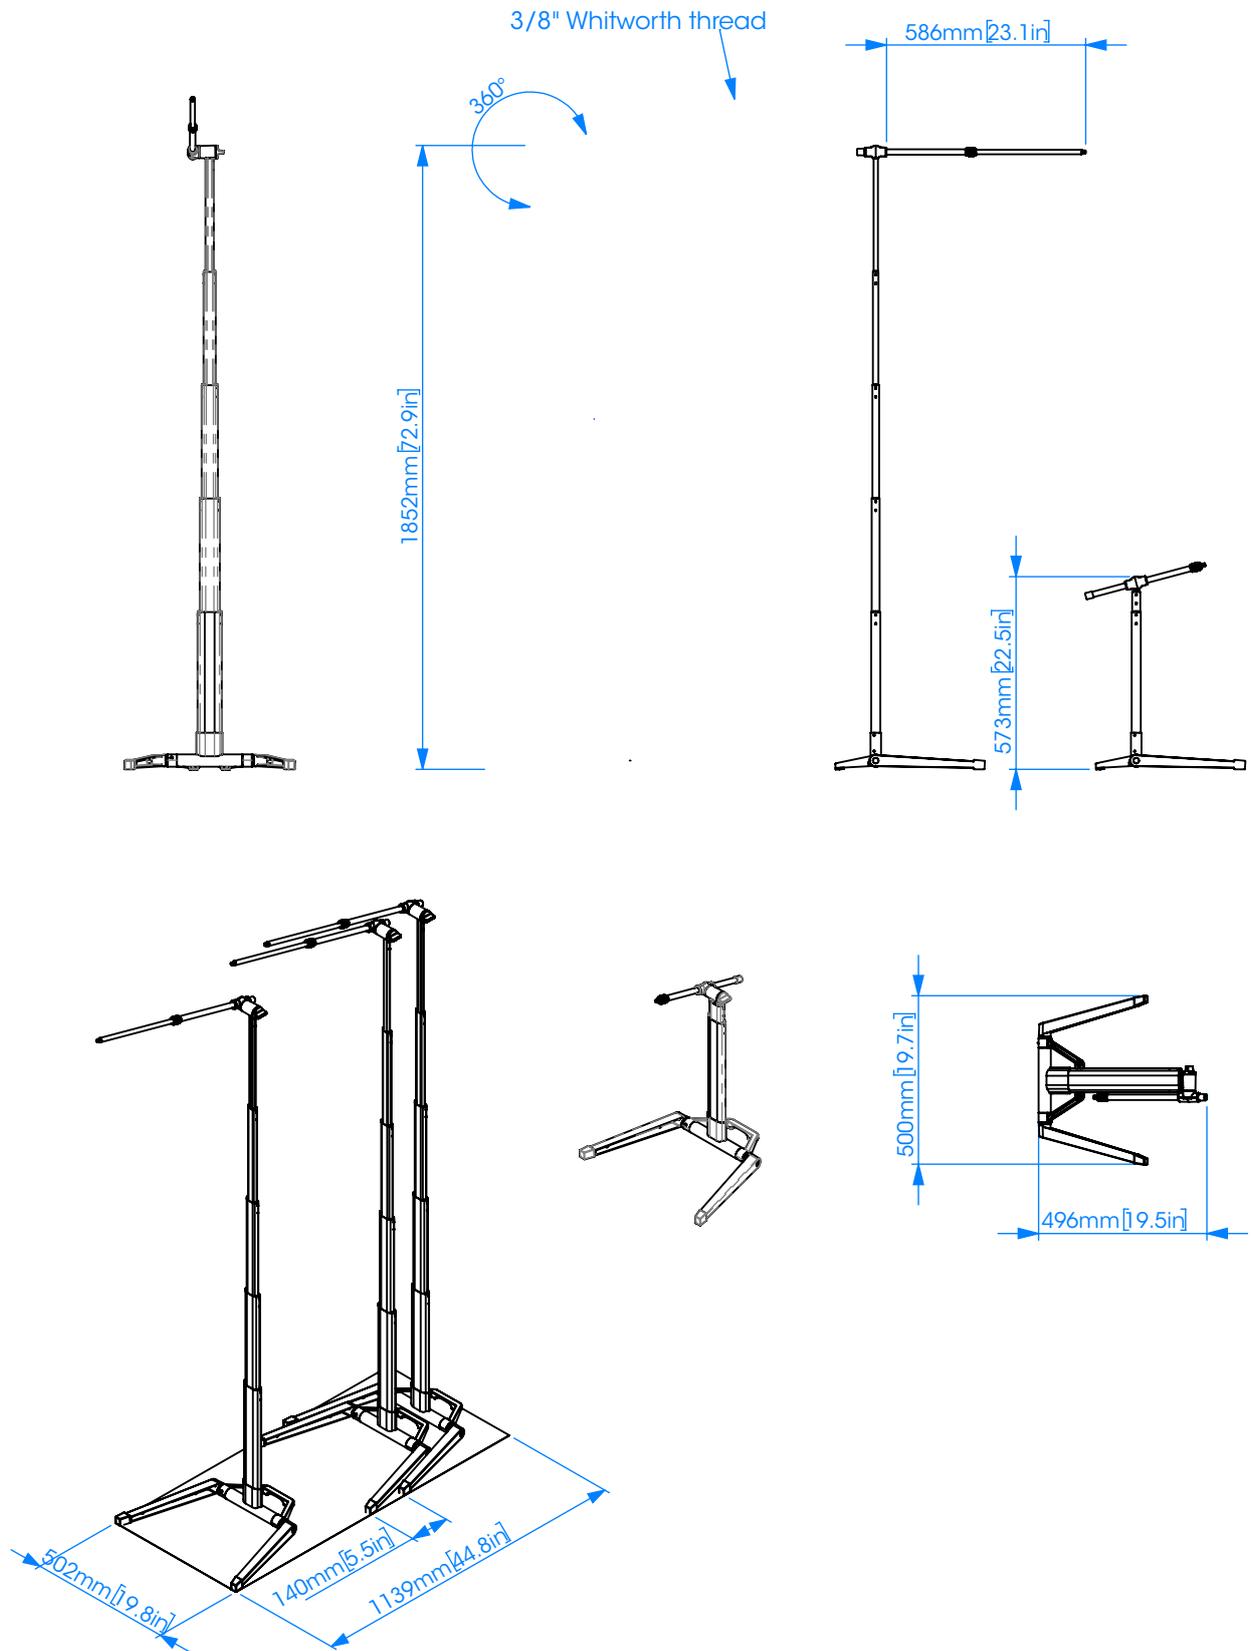

The unique base is unlike any other microphone stand. The shape allows for the stand to be placed closely to the person or chair in front. It also can be used in recording booths when space is an issue.

The die cast aluminium base adds enormous strength to the stand whilst maintaining a low weight. Rubber feet preserve the floor and the front foot ensures stability if the stand is knocked.
