# How do you use the Cylinders?

Power on/Power off: Press and hold	Last song: Press once	Next song: Press once	Search for Bluetooth signal: Press down for 5 seconds
Play/pause: Press once	Volume down: Press and hold	Volume up: Press and hold	Search for other Cylinder: Press down for 2 seconds
Answer call: Press once			Voice assistant: Double click
Reject call: Double click			

# Stereo pair or Individual Cylinder?

TWS ( **Stereo pair** ) mode: Simply turn on both Cylinders, you will hear a "power on" snare drum fill, followed by a beep that means Bluetooth mode is active, the LED lights will also be on at each end of the Cylinder. When you here the dirty guitar chords you know the Cylinders are paired and ready to rock... in STEREO!

Now you just need a device to be paired to them, so get your phone, tablet, laptop and search for Cylinders on your Bluetooth menu.

When you hear a single snare shot followed by a kick drum YOUR SOUND CHECK IS COMPLETE.

**Now enjoy music the way it was intended.**

To use Cylinders **individually**: Just switch one Cylinder on and connect it to a device before you switch the other Cylinder on.

You connect to a device by switching on your phone or other playback device's Bluetooth search setting (see Bluetooth).

If both Cylinders are turned on and paired: Press and hold the **M** button for 5 seconds on the master Cylinder ( the one that has the Soho Sound Company logo on the end ). Take the other Cylinder and connect it to a different Bluetooth device, but which Cylinder will play the better tunes now??

Connect both Cylinders back to a stereo pair when they are being used as individually: Disconnect the secondary Cylinder from Bluetooth. On the master Cylinder Hold down the M Button for 5 seconds. Now hold down the Secondary Cylinders M button for 5 seconds and repeat this step until they playback the same audio.

# How to split the Cylinders?

It is very simple but you really must be careful when snapping them back together. Take a Cylinder in each hand gently bend them until the magnets separate. When you connect them back together make sure you keep your fingers, hands and any other body parts you may or may not have in the way, out the way!

# Bluetooth

When you turn on the Cylinders they will automatically start searching for a Bluetooth device. If you want to search for a Bluetooth device in a situation when you have not auto paired or have switched to individual mode you can hold down the M button for 5 seconds.

# What if my phone rings?

You can answer it by pushing the button. We would recommend taking the call on your phone. If you disconnect from Bluetooth for the call it will automatically re-pair to the Cylinders when you finish your call.

# Charging, Aux and SD card

The find all of these inlets you must look on the underside of each Cylinder and open the compartment from left to right, it says OPEN.

The Cylinders use a twin 'Type - C' charging cable which is provided in the small tube within the main packaging tube. You will need to use a USB charging plug and the plug both Type-C connectors into the bottom of the Cylinder. Charge the speaker through the charging cable, The blue light (inside the speaker, look through grill) is on when charging. When fully charged the indicator light turns off automatically.

The Aux input is found in the same compartment as shown. Just take your 3.5mm jack and plug it into the insert on the Cylinder.

Turn on any of the speakers, put the SD card into the port, then it will enter into the SD card mode and play the music in the SD card automatically, Max 128G SD card.

# Download the 'MY SOHO SOUND' APP

When you record music you want to get your levels perfect and sounds just how you want them.

Then you let the producers and engineers work their magic and master it to perfection.

You are now able to make that final mix using the SOHO SOUND COMPANY MY SOHO SOUND APP.

This Equalising Application will allow you to choose and save presets, high end, Mids, bass and everything you need to get it sounding just the way you like it!
